the European Union

VISION

At TEF-Health, our vision is to shape the future of European healthcare through the transformative power of AI. We envision a healthcare landscape where innovative AI solutions seamlessly integrate with existing systems, enabling improved patient outcomes, enhanced healthcare delivery, and equitable access to quality care. By fostering collaboration, advancing research, and facilitating market access for trustworthy AI technologies, we strive to revolutionize healthcare and empower individuals and communities to lead healthier lives.

MISSION

Our mission is to accelerate the development and adoption of AI solutions in healthcare by providing a cutting-edge testing and experimentation facility. We are dedicated to creating an environment that enables AI developers, researchers, and industry stakeholders to collaborate, innovate, and overcome the challenges of integrating AI into the healthcare ecosystem. Through rigorous evaluation, adherence to regulatory requirements, and a focus on ethical and societal aspects, we aim to ensure the safe, effective, and responsible use of AI in healthcare settings.

EMPOWERING TRUSTWORTHY AI IN EUROPEAN HEALTHCARE
